**Product Statement**

DyStar L. P.  
Pine Brook III  
9844-A Southern Pine Blvd.  
Charlotte, NC 28273  
800-439-7827

DyStar L.P. makes the following statements concerning the heavy metal content of the colorants it sells to J.S. Vila :

DyStar L.P. carefully adheres to the obligations and requirements of all existing regulations and, to their restrictions on the presence of heavy metal impurities in our dyestuff and pigment preparations.

For those colorants which are not metal complex dyes or pigments, only unintentional trace metals are present. These trace metals are inadvertent impurities that result from processing equipment and are of low concern for wastewater.

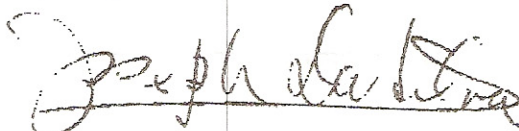

DyStar L.P. certifies that any trace metals present in our colorants will meet the ETAD recommended limits for heavy metal impurities in organic dyestuffs and pigment preparations. The current ETAD recommended limit for lead in these products is 100 ppm.

Textile colorants sold by DyStar L.P. to J.S. Vila will produce textile fabrics and garments that are Oka-Tex Standard 100 and A.A.F.A compliant when properly applied and aftertreated.

Colorants sold by DyStar L.P. do not contain phthalates.

These statements do not absolve the user from undertaking their own tests and controls to ensure that the finished articles conform to their requirements. The proper use and application of our products is not controlled by DyStar but is the direct responsibility of the user.

For further information pertaining to our colorants, please consult the appropriate product Material Safety Data Sheet (MSDS).
